## Work Experience

---

### Groundwork Detailing | Freelance

July 2017 - August 2017

[www.groundworkdetailing.com](http://www.groundworkdetailing.com)

[GitHub/HansPalacios/Groundwork](https://github.com/HansPalacios/Groundwork)

- Modern design with an easy user interface in mind
- Built out using Ruby on Rails, Javascript, and SCSS
- Worked with client directly and worked through or compromised with multiple design changes

### The New York Group | Sales Manager

April 2013 - August 2016

- Directly developed and managed sales teams of 10-20 people in CT and NYC
- Personally interviewed and screened 5-15 applicants a day
- Led training sessions to new sales offices along the eastern coast to build out sales teams and run morning meetings

## Technical Skills

---

- HTML5
- CSS & SCSS
- JavaScript
- Ajax
- SQL
- Ruby on Rails & Sinatra

## Personal Interests

---

- Business Development
- Marketing
- UI & UX
- Rock Climbing
- Kayaking
- Sailing

## Projects

---

### DateNight

*An app which gives users access to a database of great venues for different types of dates*

[GitHub/HansPalacios/DateNight](https://github.com/HansPalacios/DateNight)

- Built using Ruby on Rails, JavaScript, SQL, and SCSS with a 2 week deadline
- Using Google API for maps and easy to access information on venues
- Forum with ability to post about venues you've visited
- Able to refine your search by categories in both the list and map views

### Where Next

*An easy to use and mobile friendly app for popular clubs and bars in Williamsburg, NY*

[GitHub/HansPalacios/wherenext](https://github.com/HansPalacios/wherenext)

- Group Project, where I built out most of the backend and design, while partner designed the SVG map and functionality
- Designed for an extremely simple user experience, with easy navigation, and minimal pages
- Built using Ruby on Rails, Javascript, SCSS, SQL, and Bootstrap

### Venues

*Blog for popular nightclub venues*

[GitHub/HansPalacios/Venues](https://github.com/HansPalacios/Venues)

- Built using Bootstrap, JavaScript, Ruby with Sinatra, and SQL
- Ability to post about and view other users favorite venues
- Interactive site with easy maneuverability

### Casual Gentleman

*Product and review site for mens accessories*

[GitHub/nickfehlinger/group-Project-2](https://github.com/nickfehlinger/group-Project-2)

- Group project, where I focused on the design and functionality of the home page and product views
- Contact forms using SendGrid
- Formatted using Bootstrap, extensive Javascript, and Ruby

## Education

---

### New York Code + Design Academy | Web Development Intensive

May 2017 - August 2017

Full-time course with Javascript and Ruby on Rails
